

Virtual consultation solution that complies with all HIPAA regulations.

Designed to serve diverse health professionals such as physicians, psychologists, nutritionists, social workers, occupational therapists, speech and language, among others.

Access to health services 24 hours a day, 7 days a week from anywhere.

Ability to include up to 6 people in a video call.

## Characteristics

Web platform where service providers (doctors, nutritionists, psychologists and social workers, among others) meet to make a video consultation in real time.

The patient makes his payment before entering the video-consultation.

The software allows you to easily incorporate the branding of the client, whether it is a entity or legal person (medical group, insurance company, etc.).

Patients are connected to the video-consultation through a link generated and shared by the provider (via email and / or SMS).

The video-consultation room allows the invitation to third parties, by the patient (example: family members) and the provider (example: doctor).

Reporting module.
